Company	Private
Customer PO	
Deposit	R 0
Installation Date	2026/05/06 12:00:00 PM (Estimated arrival time due to traffic)
Google Maps Link	Open Maps
Installation Address	17 Rain Street, Sunderland Ridge, Centurion, 0157
Installation Notes	A brief overview of the current CCTV System: 64 cameras. Both Hikvision and Dahua. Recorder type: NVR. Known Issues: Yes, we do have image quality problems as most of our cameras are 2MP. We're looking for 4MP. High Risk Areas: We have two buildings. Building A and B. In both buildings, we have a server room. So that would be a high-risk area. Additionally, another high-risk area would be any location that would have our finished goods stock (peanut butter). Retention Policy: We're looking at a retention policy of 60 - 90 days. Support: We're looking at an SLA based support. Floor plans will be provided after the site visit.

INSTALLATION PREPARATION GUIDELINES

Before Our Team Arrives:

- **Site Access & Walk-through:** Please ensure someone is available at the installation site to provide access and conduct an initial walkthrough with our installation team.
- **Power Requirements:** Ensure stable electricity is available at the installation site. Each switch, DVR/NVR or power supply requires a dedicated power outlet.
- **DVR/NVR Location:** Please identify a secure, dry location for the DVR/NVR that has adequate ventilation, access to power, and is protected from unauthorized access.
- **Internet Access:** If your system includes remote viewing capabilities, please have wired (ethernet) internet access available, preferably close to the DVR/NVR location.
- **Clear Work Areas:** To speed up the installation process, please ensure that work areas are accessible and free from obstacles.
- **Mobile Device:** Please have the main cellphone or tablet that will be used to access the CCTV system available. Our technicians will assist with setting up the Hik-Connect app for remote viewing.

On the Day of Installation:

- Our team lead will be your primary point of contact during the installation. Please communicate any specific requirements or concerns directly with them on arrival.
- Our team will introduce themselves and confirm the installation plan before starting.
- Once work is complete, a final walkthrough will be done, and you'll be required to sign off on the job card.
- If our team needs to return to complete the installation due to unforeseen circumstances or site-related issues not identified in advance, additional charges may apply.

SCOPE OF WORK CLAUSE – UNIFIER CCTV INSTALLATIONS

- **Scope of Work:** The services provided by Unifier are strictly limited to the scope detailed in the official quotation and job card. Any modifications, additions, or changes to the agreed-upon work must be requested in writing and approved before implementation.
- **On-Site Changes:** Once our technicians are on-site, they will only perform the work as per the approved job card. Any additional work requested while on-site will not be undertaken unless a new quotation is issued and approved by the client.
- **Job Completion:** The technicians will prioritize completing the agreed-upon work before considering any additional tasks. If there is time remaining after completing the quoted work, the team may assist with additional tasks at their discretion, provided they do not interfere with other scheduled commitments.
- **Approval & Sign-Off:** The client or their representative must sign off on the completed work before requesting further assistance. Any additional work after sign-off may be subject to additional charges.

TERMS AND CONDITIONS

- Payment of 50% required before any work can commence. The remaining 50% is due upon completion.
- Prices are in South African Rand (ZAR) and include 15% VAT.
- If the customer is not available on the scheduled installation date, and additional callout fee will be levied for travel time.
- All equipment remains the property of Unifier (PTY) LTD until paid for in full.
- Sundries required for installation, that only becomes known to us during installation, will be chargeable upon completion of the installation.
- **Banking Details: FNB, Branch Code: 259745, Account Number: 62707889244**
- Please send Proof of Payment to sales@unifier.co.za
